

CASE STUDY

TOMIA protects diverse workloads across geographies with Commvault®

Israeli communication service provider consolidates three solutions into a single Commvault platform

Challenge

- Difficult and time consuming to manage three backup solutions in different countries, such as Veritas Backup Exec in Israel and Veeam in Germany and the United States
- Needed an efficient and agile solution to back up data from a wide range of applications and systems, such as Azure virtual machines, NAS/SAN storage, and CIFS

Solution

- Deployed Commvault® Backup & Recovery as a unified platform in Israel
- Leveraged Commvault solution to protect data from Salesforce, Office 365, and Microsoft Azure
- Commvault Professional Services and Commvault Partner, We Ankor provided support for the transition to the new platform

“The integration with Commvault was hassle-free. We can now leverage more features to simplify data management and ensure data security.”

Roie Magen | IT Manager EMEA, TOMIA

Communication | Israel

Simplified Data Management

Managed backup operations in different geographies via a single pane of glass

Rapid Deployment

Saved days to deploy new environment

Ensured Business Continuity

Protected a diverse range of workloads in the hybrid environment

Greater Flexibility

Easily store backup copies in disk and secondary copy in Azure cloud

Improved SLA

Met 99% of SLA for backups
