# Data and ransomware protection: cyber-resilience from A to Z

As cyber risks evolve, data estates grow, and IT resources shrink, today's organizations need a better way of safeguarding their invaluable data in an ever-changing threat landscape. And while traditional data protection solutions may play a pivotal role in recovering post-attack, they are reactionary, narrowly focused, and no longer sufficient. Only Commvault® Cloud, powered by Metallic® AI delivers purpose-built cyber resilience for the hybrid world. It's the industry's first platform for true, cloud cyber resilience delivering, the highest security, most intelligence, and fastest recovery. Commvault's solution for cyber-resilient ransomware protection and recovery ensures that your data is secured, defended, and recovered from A-Z.
